Convenience for patients

A customized service that handles medical treatment, payment, and medical insurance claims all at once.

LemonCare App for patients

Hospitals getting smarter

A service that realizes Smart Work, from medical treatment to surgery and cooperative treatment.

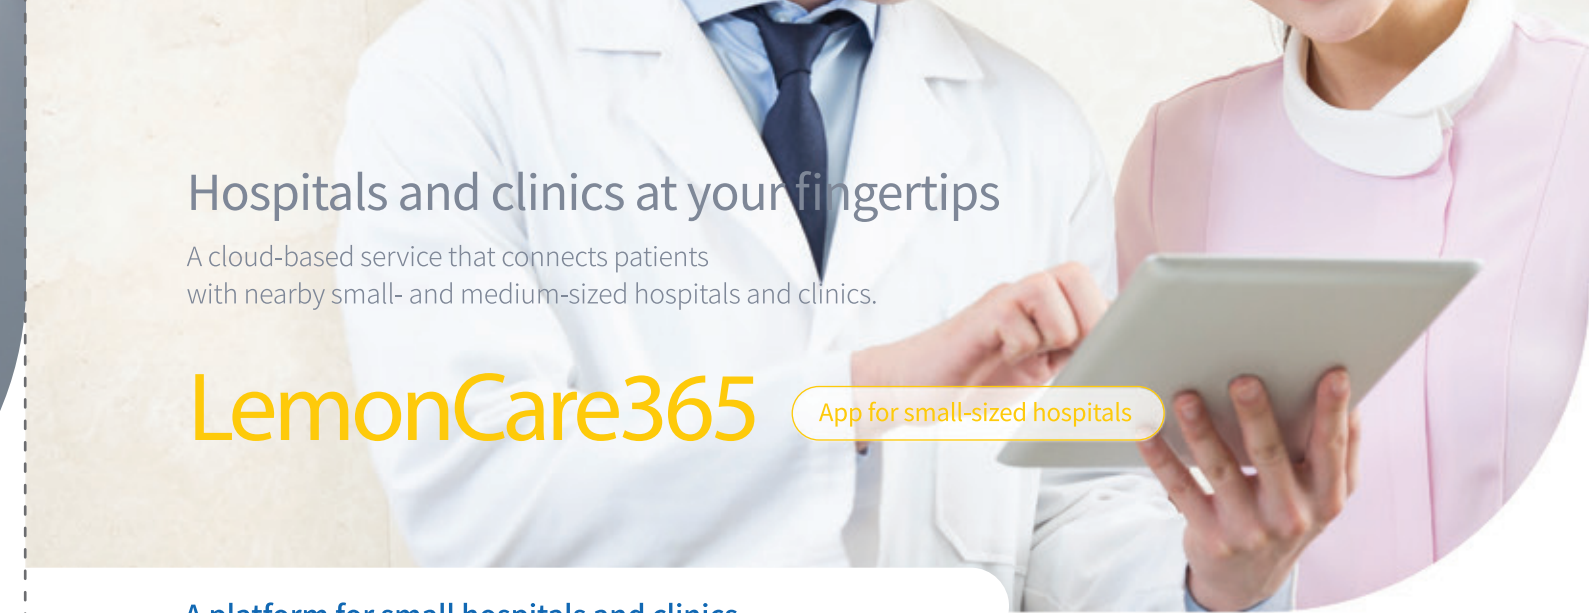

LemonCare Plus App for medical staffs

Hospitals and clinics at your fingertips

A cloud-based service that connects patients with nearby small- and medium-sized hospitals and clinics.

LemonCare365 App for small-sized hospitals

Implementing Smart Work to improve efficiencies

Easy checking of patient information on the mobile system

You can search for detailed patient information conveniently.

- Patient information
- Treatment · Operation Information
- Medication information

Simple cooperative treatment on the mobile platform

Easier processing through mobile platforms, making the collaboration process between medical staff more efficient.

Operation schedules are also available through the mobile platform

You can check surgery schedules such as anesthesia time and anticipated surgery completion time on your mobile device.

With one touch, you can check complex schedules at a glance

Communication and collaboration support systems enable flexible responses to emergencies.

A platform for small hospitals and clinics

Smart changes for medical clinics

A B2C platform that optimizes the core functions of LemonCare for small hospitals and clinics.

Providing core features

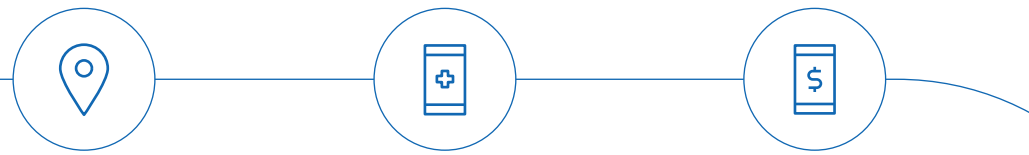

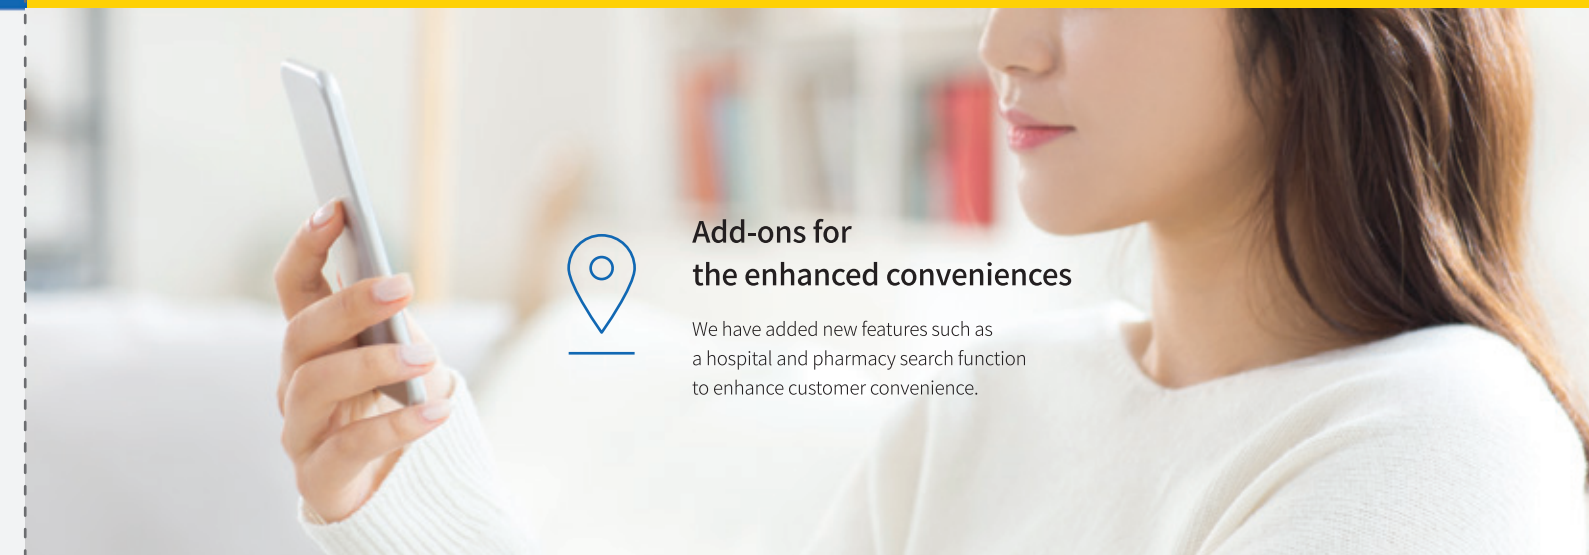

From reservations and inquiries to insurance claims and prescription transfers, all of LemonCare's core functions are included.

- Reservation inquiry
- Mobile payment service
- Medical insurance claims
- E-prescription delivery service

Add-ons for the enhanced conveniences

We have added new features such as a hospital and pharmacy search function to enhance customer convenience.

Complex procedures, no more confusion!

Provides step-by-step, customized guidance and real-time, location-based navigation, recognizing patients' movement and medical data.

From making appointments to getting queue tickets with just your smartphone

You can use your smartphone to do things you normally would have to visit the hospital for, such as making appointments and getting queue tickets so you can access hospital services without waiting.

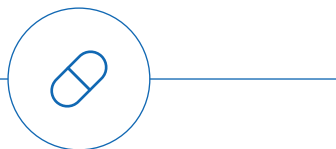

Mobile payment that doesn't make you wait

This service allows you to easily pay your medical expenses through your smartphone, anytime and anywhere.

Information security is critical for sensitive healthcare data

For secure information management, we utilize authentication methods based on biometrics.

Immediately submit medical insurance claims

You can bill your insurance company with the mobile app for prescriptions with your receipts as required for the medical insurance claims.

E-prescriptions to shorten your queuing line at the pharmacy

You can send electronic prescriptions to pharmacies on your smartphone, and process prescription drug requests and payment without having to visit the pharmacy.
